

WHAT WE LEARNED FROM ASSIGNMENT 4

1. RESPONSIVE UI DESIGN

- Learned how to create Flutter interfaces that adapt to different screen sizes such as desktop, tablet and mobile.

2. MEDIAQUERY

- Learned how to use MediaQuery to detect screen width and adjust the layout based on the available screen size.

3. GRIDVIEW

- Learned how to use GridView to display dashboard cards in multiple columns and change the number of columns according to screen size.

4. LISTVIEW

- Learned how to use ListView for displaying large or dynamic amounts of content in a scrollable layout.

5. FLEXIBLE AND EXPANDED

- Learned how Flexible and Expanded widgets distribute available space and help create layouts without overflow problems.

6. RESPONSIVE NAVIGATION

- Learned how to create different navigation experiences for larger and smaller screens using a sidebar and drawer.

7. REUSABLE WIDGETS

- Learned how to divide the UI into reusable widgets such as StatCard, OverviewCard, ActivityTile and Sidebar.

8. MULTI-FILE PROJECT STRUCTURE

- Learned how to organize a Flutter project into separate files and folders for models, screens and widgets instead of writing everything inside main.dart.

9. DYNAMIC INTERACTION

- Learned how to add interactive features such as task filtering, completing tasks, adding tasks, navigation and theme switching.

10. UI/UX DESIGN

- Learned how to create a clean and modern dashboard using cards, icons, spacing, colors, progress indicators and consistent layouts.

11. NAVIGATION BETWEEN SCREENS

- Learned how to connect different screens and allow users to move between Dashboard, Analytics, Projects and Tasks.

12. TESTING AND DEBUGGING

- Learned how to test the application on different screen sizes, identify UI errors and use flutter analyze to check the project.

CONCLUSION:

- This assignment helped us understand how to build responsive, interactive and well-organized Flutter applications.
- We learned how to combine responsive layout widgets, navigation and reusable components to create a professional dashboard interface.
