FLUTTER ASSIGNMENT 3 REPORT PROFILE CARD UI

Student Name: Chandresh Dubey
Assignment: Assignment 3 – Profile Card UI
Technology: Flutter & Dart

1. AIM

The aim of this assignment is to create a Profile Card UI in Flutter using basic layout and UI widgets such as Column, Row, Container, CircleAvatar, Text, and Icon with custom theme colors.

2. OBJECTIVE

The main objectives of this assignment are:

- To understand Flutter's widget-based UI structure.
- To use Row and Column for arranging UI elements.
- To use Container for styling and layout.
- To use CircleAvatar for profile representation.
- To use Text and Icon widgets for displaying information.
- To apply custom colors and themes.
- To create a clean, responsive, and attractive profile interface.

3. IMPLEMENTATION

A Flutter application was developed containing a profile card centered on the screen.

The profile card includes:

- Profile avatar
- Name and designation
- Availability status
- About Me section
- Contact information
- Skills section
- Profile statistics
- Follow and Message buttons
- Theme toggle

The profile displays the following information:

Name: Chandresh Dubey
Designation: Computer Science Student

Location: Mumbai, India
Email: chandresh@example.com
Phone: +91 98765 43210

The skills displayed are Flutter, Dart, Python, Machine Learning, and Git.

The statistics section displays:

Projects: 12
Skills: 8
Years: 3

4. WIDGETS USED

Column:
Used to arrange different sections vertically.

Row:
Used to arrange contact information, statistics, and buttons horizontally.

Container:
Used for backgrounds, spacing, rounded corners, and overall card styling.

CircleAvatar:
Used to display the profile avatar.

Text:
Used to display the user's name, information, skills, and statistics.

Icon:
Used for location, email, phone, profile, theme, and action buttons.

5. DESIGN AND FEATURES

A purple-based custom theme was used throughout the application. Rounded corners, shadows, spacing, and a gradient-style header were added to improve the visual appearance.

Additional features such as an availability indicator, skill chips, Follow and Message buttons, and a theme toggle were added to make the interface more attractive and interactive.

6. TESTING

The application was successfully tested using Flutter Web in Google Chrome.

The following were verified:

- Profile card displays correctly.

- All profile information is visible.
- Icons and text are properly aligned.
- Skills and statistics are displayed correctly.
- Buttons are visible and functional.
- Theme toggle works correctly.
- UI maintains proper spacing and styling.

7. RESULT

The Profile Card UI was successfully created using Flutter. The application fulfills the required assignment objectives and demonstrates the use of fundamental Flutter layout, styling, and UI widgets.

8. LEARNING OUTCOMES

Through this assignment, I learned:

- How to structure a Flutter UI using widgets.
- How to use Row and Column for layouts.
- How to style widgets using Container.
- How to use icons and avatars effectively.
- How to apply custom themes and colors.
- How to create an attractive and responsive Flutter interface.
- How to add basic interaction to a Flutter application.

9. CONCLUSION

This assignment provided practical experience in creating user interfaces with Flutter. By combining basic widgets, custom styling, layouts, and simple interactions, a modern Profile Card UI was successfully developed. The concepts learned can be applied to larger Flutter applications and more complex UI designs.
